**Iqama Profession and Status- Civil Engineer & Transferable**

**Total years of experience: 17+**

## Professional Summary:

A PMP-certified and highly qualified Civil Engineer with 17 years of comprehensive experience in dynamic construction management, engineering design, and supervision within EPC, PMC and CSC organizations. My professional portfolio encompasses a diverse array of projects, including infrastructure, structural, and architectural works for high-rise buildings, developmental housing units, Ministry of Defense as well as large scale PIF projects. I ensure strict adherence to international standards, local regulations, and Saudi building codes, RSAF/USAF codes. Currently, I am contributing to the Meinhardt Group in a demanding, performance-oriented capacity as an Resident Engineer on Project W, where I provide expertise on construction management, engineering design review and supervisory services. Seeking a challenging position in a progressive organization with an aim to enhance the credibility and goodwill of the firm and to develop strong relationships with key stakeholders throughout the project until successful completion.

## Experience History:

**Resident Engineer @ Meinhardt group (PMCS Services)-Al Ula, Saudi Arabia**

**Nov 2023 to Present**

**Project: Construction Road and Enabling Works and Asset Projects (PIF Project - W)**

(SOWs included Earthwork, Stone wall, Horse Pilot, Warehouse, Golf Courses, Roads, Tunnel and Bridge construction)

### Key Responsibilities:

- Managing design & Build contractor in civil engineering projects, including site preparation, Infrastructure development, and construction management.
- Lead the design, analysis, and review of Earthwork, roads, and related civil & Infrastructure drawings to ensure that they meet the contract and project requirements, local codes, and regulatory Authority compliances, ensure compliance of local environmental regulations.
- Reviewing of Concept design drawing/IFC/ MAR/MST/MIR's, Calculations and specifications that aligns with the client requirements and local & international codes, safety regulations, and industry standards. ensuring that all changes and adjustments are documented appropriately.
- Document inspection findings, observations, and test results in detailed reports, noting any deficiencies, deviations, or areas of concern, and liaise with project stakeholders to address issues promptly.
- Providing technical support to the construction team including interpreting design drawing, resolving technical issues and coordinating with stockholder for project successful completion with coordination of all stakeholders.
- As a Asst. Resident Engineer, always play a crucial role in supporting the successful execution of construction projects by assisting the Resident Engineer in various administrative, technical and managerial tasks.
- Ensuring terms of the contract are followed and manage scope changes and their effect on delivery of project objectives.
- Act as a key technical advisor for construction teams and provide solutions for site-specific challenges, in historically significant or sensitive areas.
- Ensure testing and commissioning and closure of project is systematic and complete in all respects including snagging/de-snagging until final handover.

### TARGETS JOB:

Targeting senior level assignment in Resident Engineer/Construction Manager/Sr. Construction/Civil Engineer with a leading organization of repute in Construction/Infrastructure industry preferably in the Middle East.

### EDUCATION/CERTIFICATIONS:

-B.Sc. Civil Engineering, University of Engineering & Technology Peshawar (2004-2008), Pakistan,  
-Project Management Professional (PMP)- No. 3796450

### PROFESSIONAL REGISTRATION:

-Pakistan Engineering Council Membership No: Civil/28294  
-Saudi Council of Engineer Membership No: 194812  
-Institute of Civil Engineers (ICE-UK) Membership No: 93662588

### AREAS OF EXPERTISE

Tech. Engineering Services, Architecture, Civil, Construction Management, PMC, Supervision and Construction Submittals Review, Design Review, Schedule review, Weekly /Monthly Progress/Quality reports review.

### KEY SKILLS

-Civil Engineering and Construction Project Management.  
-Project Strategic Planning and Schedule Management.  
-Project Resources & Stakeholders Management.  
-Project Communication Mgmt.  
-Strong motivational, mentoring and negotiation skills,  
-Project Execution, Supervision and Conflict management  
-Self-decision, Problem-solving, Team leadership and excellent coordination.  
-Ability to lead and manage multidisciplinary teams and coordinate work across different project phases.  
-Knowledge of Aconex, Procore, AutoCAD, STAAD Pro, SAP and SAFE.

### LANGUAGES

English, Urdu and Arabic

---

**Construction Resident Engineer @ Saudi Arabian Parsons Limited (PMC)- KSA  
Feb. 2022 to Oct. 2023****Project: Developmental Housing Program by National Housing Co. Ministry of Housing**

(SOW includes Housing Units & Infrastructure facilities i.e. Earthwork, Road & Street Lights, Drainage and Waste water network)
